

Medical Cobotics Centre under the aegis of Research and Development Cell SGT University Gurugram in collaboration with STEAM Varsity organizes:

Summer Camp 2026

Design Thinking and Innovation with Robotics

Explore the future of healthcare with robotics through an interdisciplinary approach to STEAM (Science, Technology, Engineering, Arts and Mathematics)

June 1 – 5, 2026
(Monday to Friday)

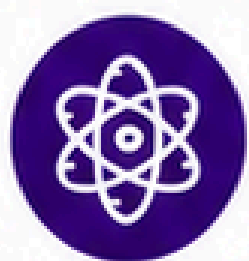

10 am to 4 pm

**Medical Cobotics Centre,
SGT University**

WORKSHOP PEDAGOGIES:

**Interdisciplinary
STEAM**

**Learning by
Doing**

**Research based
learning**

**Problem/Project
based learning**

**Peer learning &
Peer mentoring**

WHY JOIN?

- Ignite your curiosity. Build real-world solutions.
- Shape the future of healthcare with robotics!
- Work on real challenges, learn by doing and innovate.

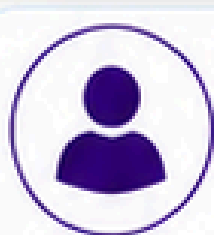

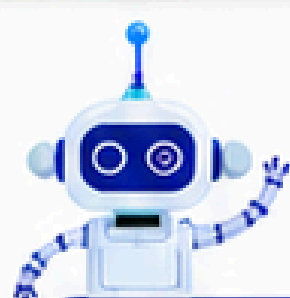

WHO CAN JOIN?

- Students passionate about innovation, robotics, healthcare, and making a difference!
- Individuals eager to learn, build and make a difference!
- Open to all disciplines and backgrounds.

KEY HIGHLIGHTS

- Hands-on Robotics Experience
- Design Thinking Workshops
- Interdisciplinary Team Learning
- Expert Mentorship
- Healthcare Environment Focus
- Certificate of Participation

Co-ordinator
Dr Renuka Sharma
Deputy Dean Research and
MCC Mentor

**Certificate will be provided
after the completion of the
course.**

WORKSHOP AGENDA

DAY 1

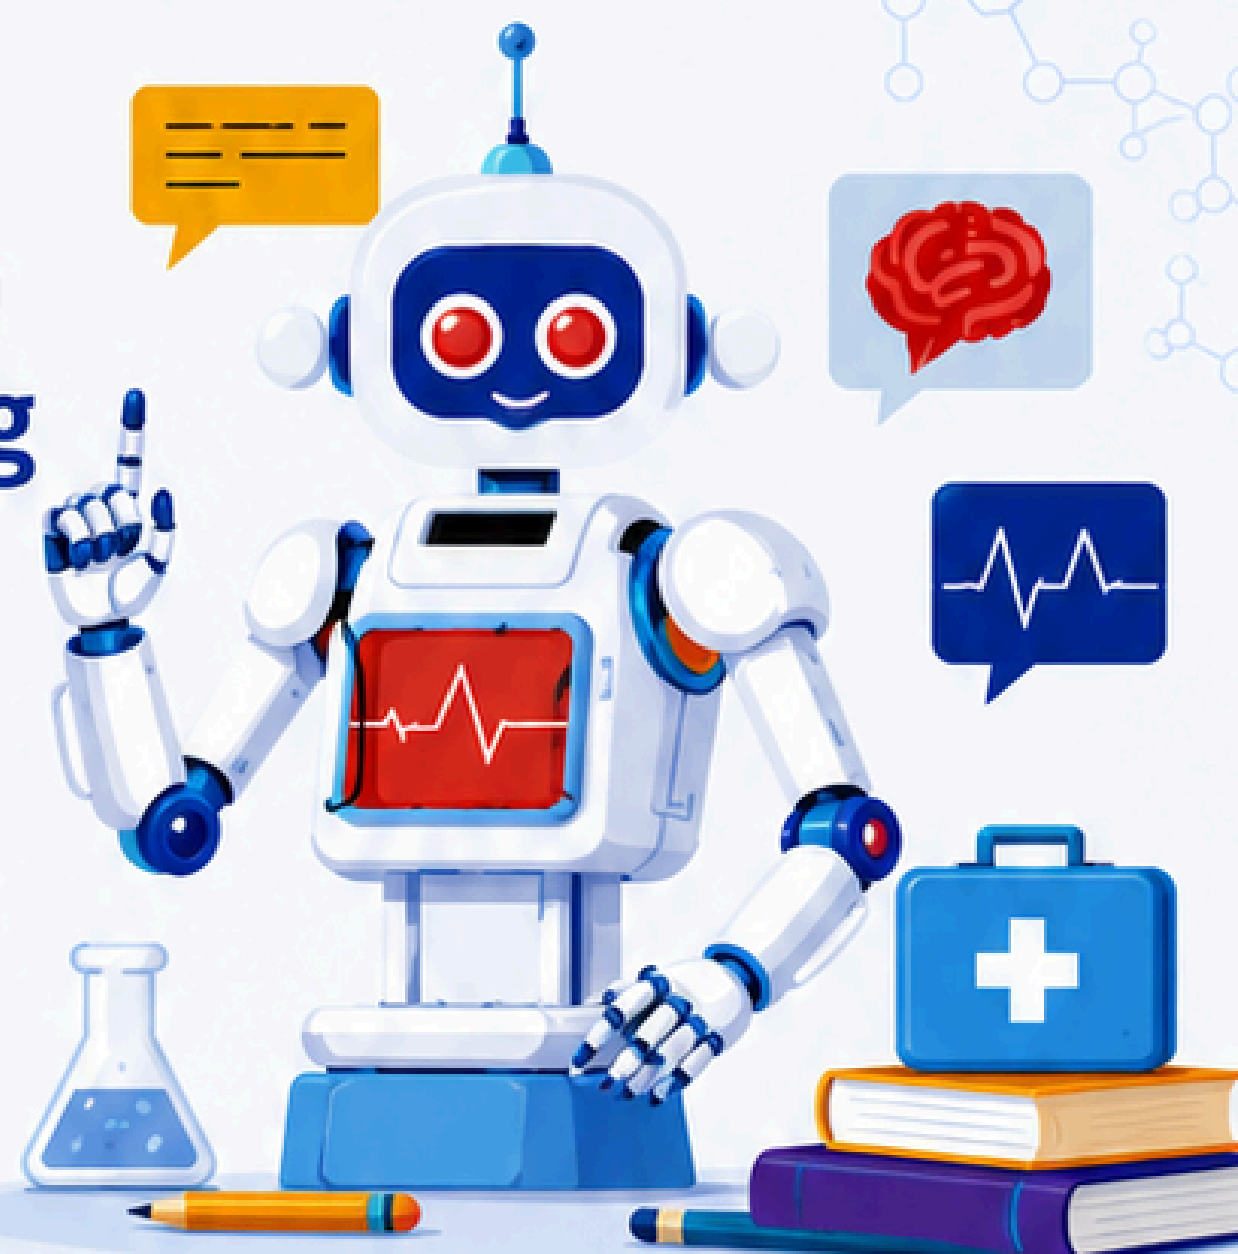

Introduction to Design Thinking & Robotics

Objective:

To introduce participants to the fundamentals of design thinking and robotics, and explore real-world healthcare challenges through engaging activities.

10:00 – 10:30 AM

Welcome, Orientation & Icebreaker Activities

Get to know each other, understand the camp objectives and build team spirit.

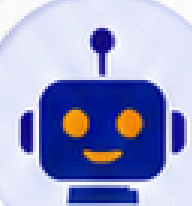

10:30 – 11:30 AM

Introduction to Design Thinking

Explore the 5 stages: Empathize, Define, Ideate, Prototype, Test with engaging examples.

11:30 AM – 12:30 PM

Basics of Robotics: Components, Sensors & Actuators

Learn about the building blocks of robots and how they work together.

01:30 – 02:30 PM

Demo of Healthcare Robotics (Real-world Applications)

See how robotics is transforming healthcare through real-life case studies and live demos.

02:30 – 04:00 PM

Team Formation & Problem Area Exploring (Healthcare Challenges)

Form teams and explore current healthcare challenges to identify areas of interest.

WORKSHOP PEDAGOGIES:

Interdisciplinary
STEAM

Learning
by Doing

Research
based
learning

Problem/Project
based
learning

Peer learning &
Peer mentoring

WORKSHOP AGENDA

DAY 2

Empathy & Problem Definition

Objective:

To help participants understand users, identify real healthcare problems, and define clear problem statements.

10:00 – 10:30 AM

User Empathy Exercises

Step into users' shoes through role plays, interviews, and empathy mapping activities.

10:30 – 11:30 AM

Identifying Real Healthcare Problems

Explore pain points in hospitals, clinics, and communities. Group discussions and insights.

11:30 AM – 12:30 PM

Field Insights / Case Studies in Medical Robotics

Analyze real-world case studies and innovations in healthcare robotics.

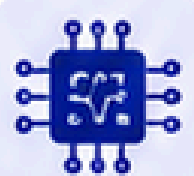

01:30 – 02:30 PM

Define Problem Statements

Convert insights into meaningful problem statements using 'How Might We' approach.

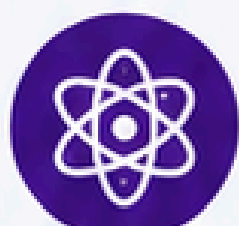

02:30 – 04:00 PM

Introduction to Basic Electronics & Safety

Learn basic components, circuits, and essential safety practices in robotics.

WORKSHOP PEDAGOGIES:

Interdisciplinary
STEAM

Learning
by Doing

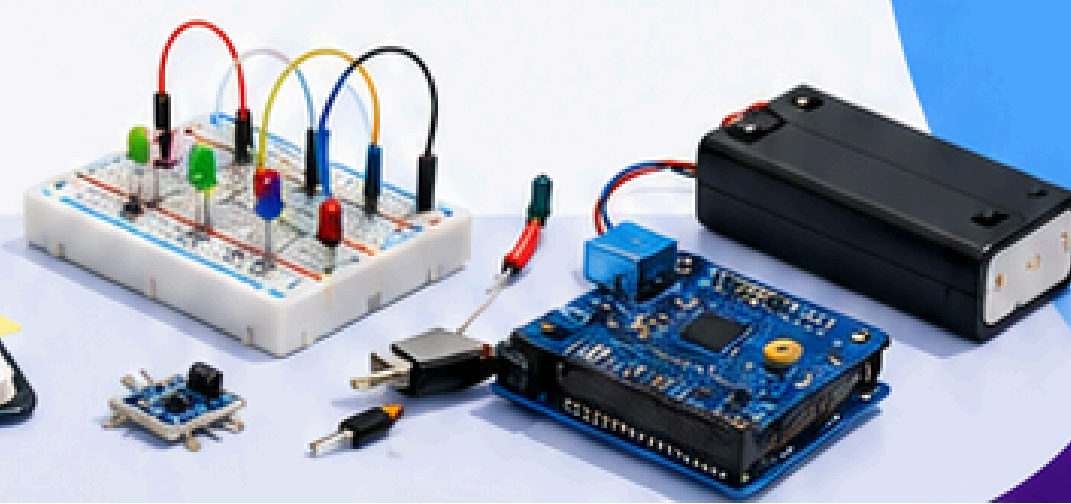

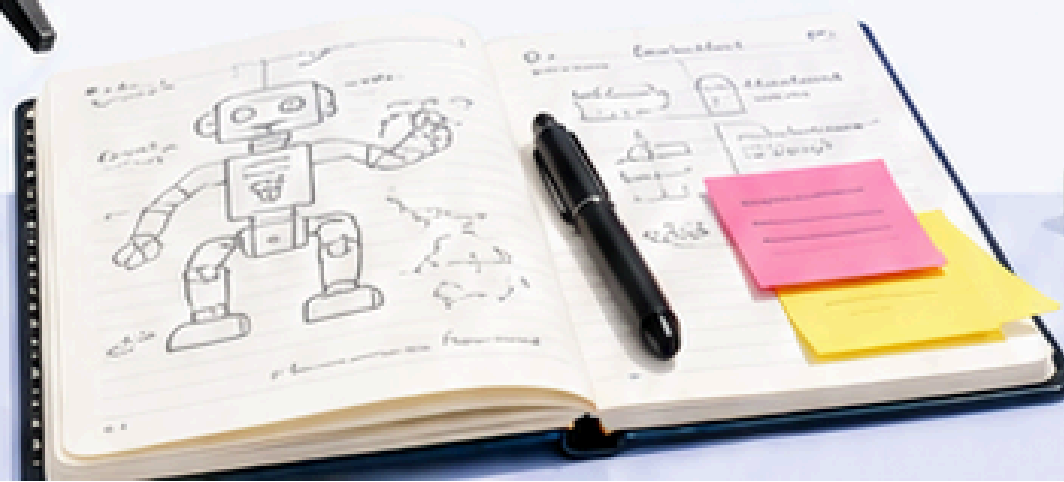

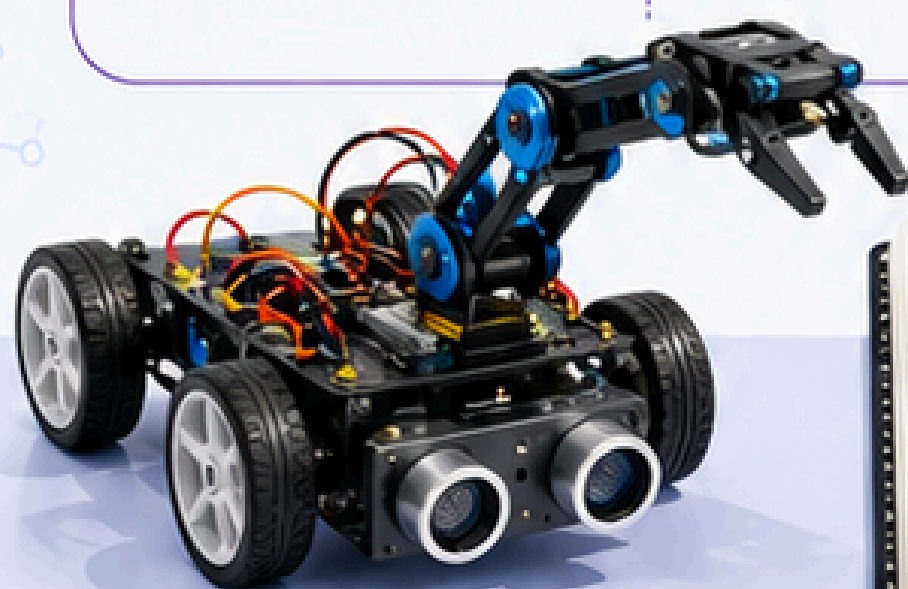

Research
based
learning

Problem/Project
based
learning

Peer learning &
Peer mentoring

WORKSHOP AGENDA

DAY 3

Ideation & Concept Development

Objective:

To generate innovative ideas and develop concepts for robotic solutions using creativity, engineering fundamentals, and basic programming.

10:00 – 10:30 AM

Brainstorming & Idea Generation

Use creative thinking techniques to brainstorm robotic solutions for real healthcare problems.

10:30 – 11:30 AM

Sketching Robotic Solutions

Transform ideas into sketches and simple diagrams to visualize the solution.

11:30 AM – 12:30 PM

Introduction to Programming Basics

Learn basic programming concepts and write simple code to control robot functions.

01:30 – 02:30 PM

Component Familiarization (Motors, Sensors, Controllers)

Hands-on exploration of motors, sensors, controllers and how they work together.

02:30 – 04:00 PM

Finalizing Project Concepts

Refine ideas, define working models and plan the approach for building prototypes.

WORKSHOP PEDAGOGIES:

Interdisciplinary
STEAM

Learning
by Doing

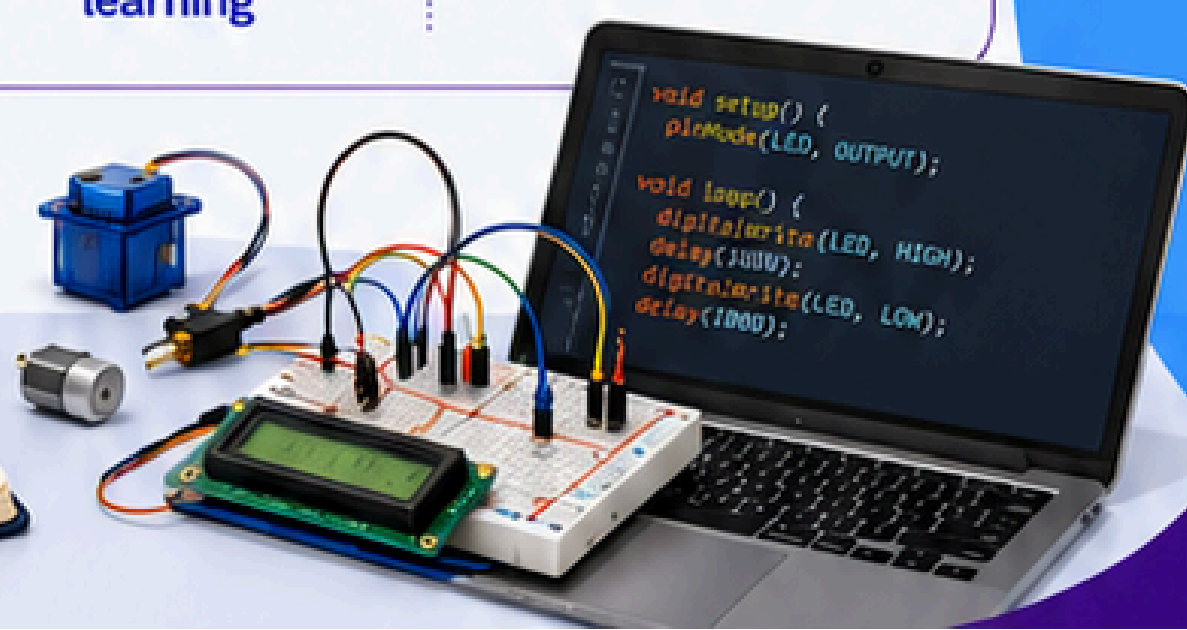

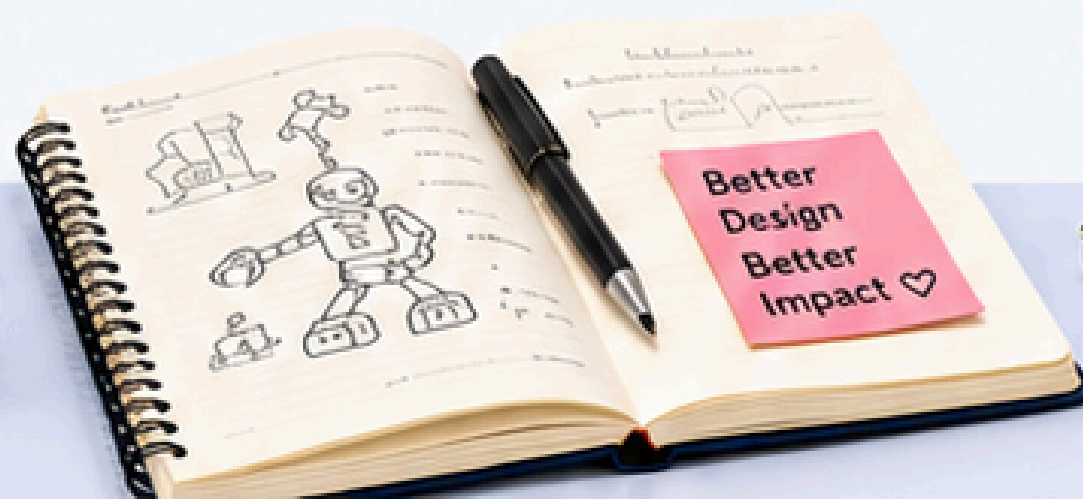

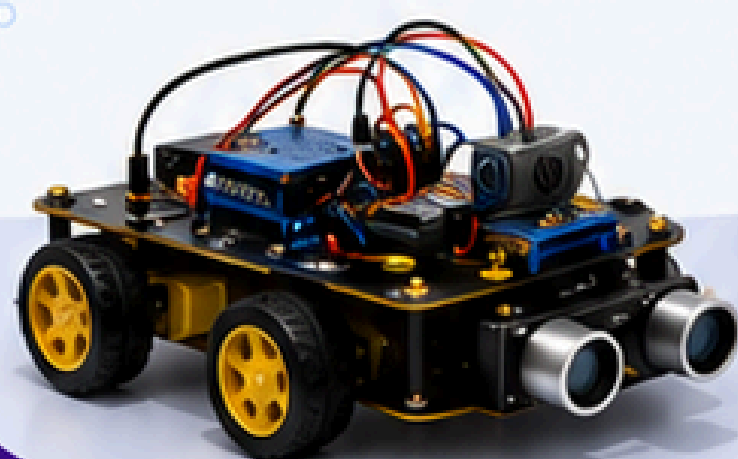

Research
based
learning

Problem/Project
based
learning

Peer learning &
Peer mentoring

WORKSHOP AGENDA

DAY 4

Prototyping & Building

Objective:

To build and test robotic prototypes, integrate components and sensors, and refine solutions through iteration and feedback.

10:00 – 10:30 AM

Building Robotics Prototypes

Construct your robotic models using the selected components and tools.

10:30 – 11:30 AM

Programming & Integrating Sensors

Write code and integrate sensors, actuators and other components to bring your robot to life.

11:30 AM – 12:30 PM

Testing & Troubleshooting

Test your prototype, identify issues, debug and make improvements.

01:30 – 02:30 PM

Iteration Based on Feedback

Refine your design and functionality based on test results and peer/mentor feedback.

02:30 – 04:00 PM

Preparing for Final Presentation

Document your prototype, prepare demo materials and plan your final presentation.

WORKSHOP PEDAGOGIES:

Interdisciplinary
STEAM

Learning
by Doing

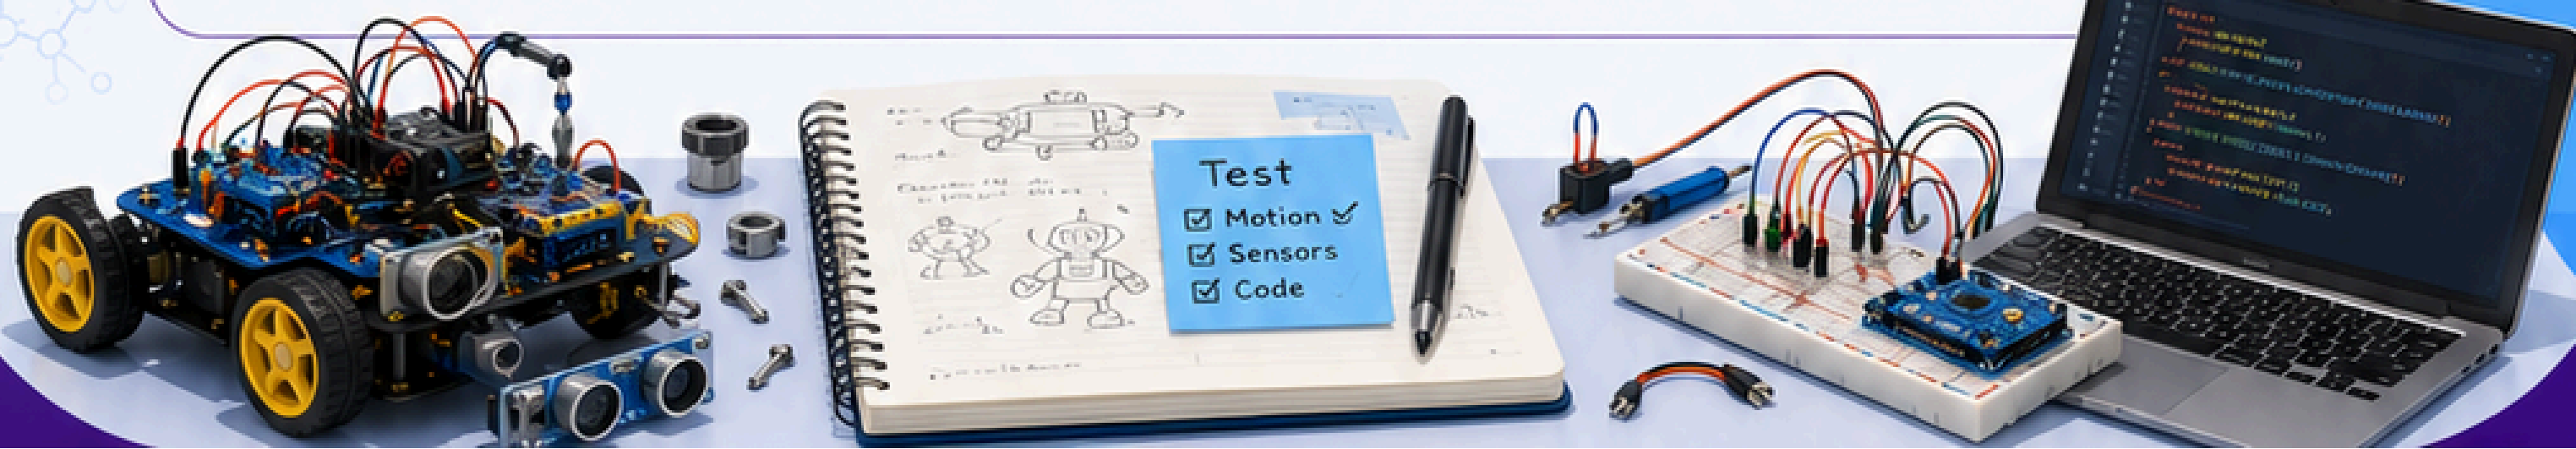

Research
based
learning

Problem/Project
based
learning

Peer learning &
Peer mentoring

WORKSHOP AGENDA

DAY 5

Testing, Presentation & Showcase

Objective:

To test, refine and showcase the robotic solutions and communicate their impact through effective presentations.

10:00 – 10:30 AM

Final Prototype Testing & Improvements

Test your prototypes thoroughly and make final improvements for performance and reliability.

10:30 – 11:30 AM

Preparing Pitch (Problem → Solution → Impact)

Create a compelling pitch that highlights the problem, your solution, and the impact it can create in healthcare.

11:30 AM – 01:00 PM

Team Presentations & Demos

Present your prototypes, demonstrate how they work, and showcase the impact of your solution.

01:00 – 02:00 PM

Feedback from Mentors / Judges

Receive constructive feedback, suggestions and insights to help you grow and improve your ideas.

02:00 – 04:00 PM

Closing Ceremony

Recognition of teams, certificates, group photo and closing remarks.

WORKSHOP PEDAGOGIES:

Interdisciplinary
STEAM

Learning
by Doing

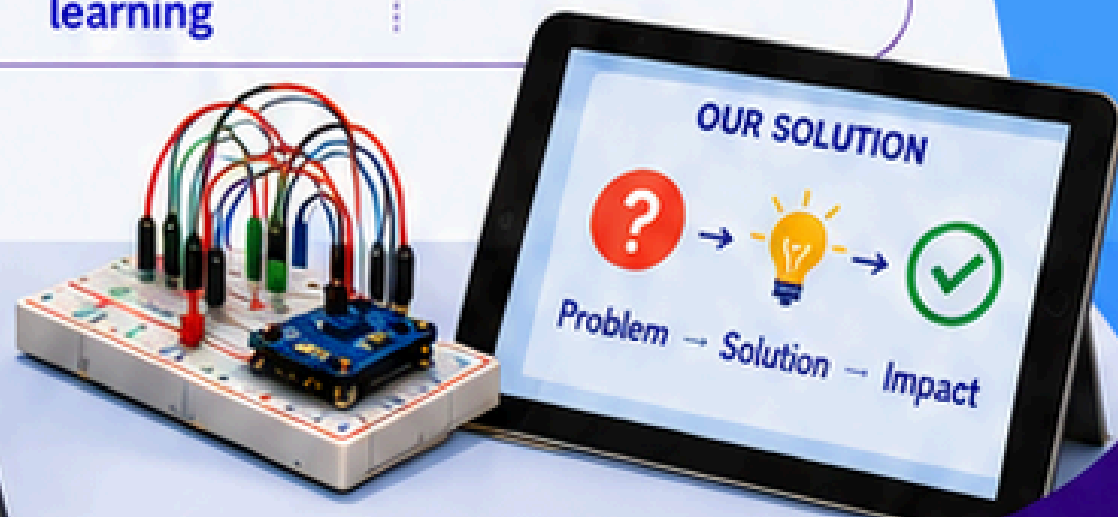

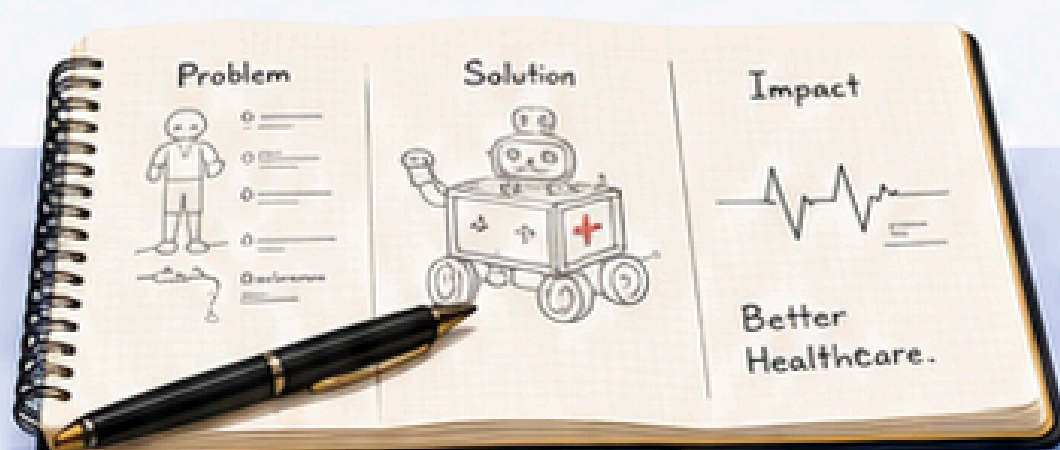

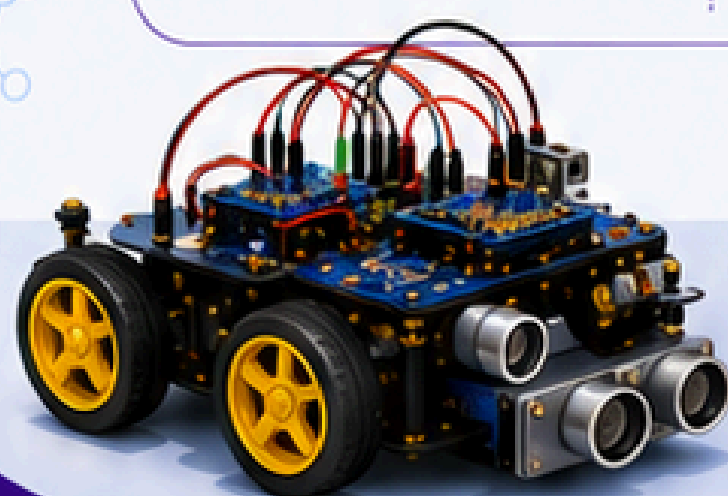

Research
based
learning

Problem/Project
based
learning

Peer learning &
Peer mentoring

Medical Cobotics Centre,
SGT University, Gurugram

Certificates will be provided upon
successful completion of the course.

Participants Must Bring
Their Own Laptop

REGISTRATION

Scan the QR code to register

Institute - DASHMESH
EDUCATIONAL CHARITABLE TRUST
Branch - SGT form 1-6

REGISTRATION COST

₹ **5000/-**
PER PARTICIPANT

Registration fee is non-refundable
and non-transferable.
